

WHO WE ARE

Don Cummings is an Adobe Certified Associate specializing in graphic design for every day needs.

Though he has recently entered the professional graphic design field as a freelancer, he has forty years experience in communicating persuasively with people.

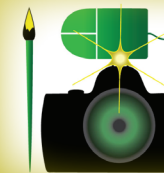

As an ordained pastor, he led four congregations, preached thousands of messages, taught hundreds of classes, wrote countless articles and conducted numerous capital campaigns. He was noted for his ability to communicate clearly the evolving needs of his congregations and inspire people to positive action. Graphic design in print and on screen was a large part of his communication strategy.

Graphic design combines inspiration with illumination to communicate an idea, identity, emotion, or product to an audience whose benefit is the aim of the graphic design process.

If you have an idea to promote, a story to tell, an event to capture, a feeling to communicate, or an identity to brand, we can help. Our process begins with learning about your graphic design needs so we can best help you inspire and illuminate your audience.

Designer Note Cards

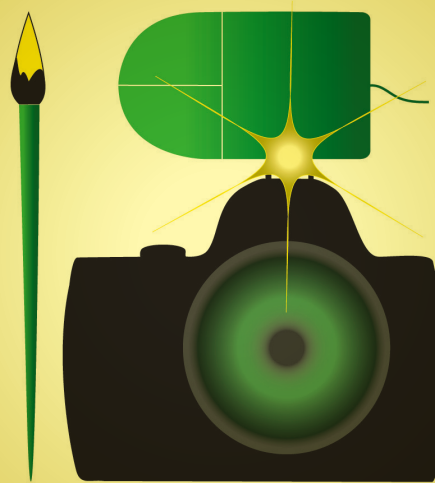

Our note and greeting cards feature the photography of Don Cummings. Stunning landscapes, floral close-ups, whimsical images, and original designs help you communicate the personal messages you want to share with the people in your life. General and seasonal themes are available with or without inside messages printed on the card. We can even design a card using your photo and/or message.

Photo Restoration

Are the old family photos languishing in the attic? We can convert them to digital pictures for you. Send us your old tattered, worn or faded pictures and we'll digitally color correct and restore them. We can repair spots, dust, and missing emulsion. While we can't improve on focus, we can improve on just about every other quality of beloved pictures and return them to you almost good as new as prints or on a CD.

Bringing Together Elements of

Graphic Design for Your Everyday Needs

General Graphic Design

We create business cards, forms, logos, brochures, newsletters, reports, flyers, etc. to help promote your business, product or service. The right piece with a persuasive message can help get your job done more effectively.

Family History Publishing

We'll take your family narrative, pictures and documents and we will fold them into a beautiful Family History book, album, or multi-edition e-newsletter.

Web Design

We can design and maintain a personal or family blog, or provide assistance with a business website and create documents that meet web-based design requirements. Contact us for a conversation about your web-based needs at 440-552-5570.

Special Event Photography

We photograph family reunions, baptism, confirmation and graduation gatherings, or any special event you would like to memorialize with professional quality photography. The end result could be an album, a video slide program, postings on a website, and all the photos on a CD.

Home & Property Photography

Is there a cherished cottage in your family? A cabin in the mountains? A farm or ranch that goes back generations? Arrange with our photographer to document your home or property with pictures from every perspective stored on a digital CD/DVD for posterity. His largest project so far is a 320 acre ranch in Colorado.
